UNITED STATES COAST GUARD NAVIGATION INFORMATION SERVICE (NIS)

The United States Coast Guard Navigation Information Service (NIS), operated by the USCG Navigation Center, is staffed 24 hours a day, 7 days a week. The NIS provides information on the current operational status, effective policies, and general information for GPS and DGPS. The NIS also disseminates Safety Broadcasts (BNM), Local Notice to Mariners (LNM), and the latest Notice Advisory to Navstar Users (NANU). NANU notices can also be obtained via e-mail subscription through the USCG Navigation Center website

<http://www.navcen.uscg.gov/?pageName=GPS>

In addition, the NIS investigates all reports of degradation or loss of GPS or DGPS service. Mariners are encouraged to report all degradation of radio navigation services to the NIS via any of the following: Phone: 703-313-5900, Email: webmaster@navcen.uscg.mil or on the World Wide Web at: <http://www.navcen.uscg.gov>.

SECTION I - SPECIAL NOTICES

This section contains information of special concern to the Mariner.

WASHINGTON – EVERETT – SNOHOMISH RIVER – Snohomish River Bridge

Construction is being conducted on the SR 522 Snohomish River Bridge until Oct 2012. A temporary work trestle will be built extending halfway into the Snohomish River from the east bank, and is marked with yellow dayboards, and lighted with flashing yellow (FI Y) lights. Mariners exercise caution. For more information, visit www.wsdot.wa.gov/projects/SR522/Widen/SnoRiver_US2/, or contact Janice Fahning at (425) 225-8725.

LNM: 27/12

COLUMBIA RIVER – MCNARY DAM – High River Flow

Recent rainstorm events have resulted in record inflows in the upper Columbia River basin. The Tri-Cities is experiencing higher flows in Lake Wallula (the McNary Dam reservoir on the Columbia River), particularly in designated flowage easements and other low-lying areas along the river near the upstream end of the reservoir. River users should keep safety in mind whenever they are in, on or near the water – wear a lifejacket when boating or participating in water sports. Higher flows mean the water is fast, cold, and carrying surface and submerged floating debris. Woody debris swept into the river from shorelines and tributaries can range from twigs to telephone pole-sized logs, creating hazards to swimmers, boaters and water-skiers.

The USACE Walla Walla District, which operates the McNary Dam, has provided this link to news releases from the USACE Seattle District, which coordinates water management operations for the upper Columbia system of dams:

WASHINGTON – LAKE WASHINGTON – SR520 BRIDGE: Special Bridge Notice (REVISED Draw Operations)

The Coast Guard has revised the draw span operating schedule for the SR 520 Evergreen Point Floating Bridge. The east side navigation channel is currently completely closed or partially blocked during construction activity associated with the replacement bridge. Construction activities will continue in and around the east navigation channel for the duration of the bridge replacement project until approximately 30 Aug 15.

Vessels which are impacted by the closure of the east channel that are not able to navigate through the west channel of the existing bridge may request an opening of the center draw span for passage. Boaters may request a draw span opening by calling WSDOT at (206) 440-4490. The draw of the Evergreen Point Floating Bridge between Seattle and Bellevue shall operate as follows (revised schedule):

- (a) The draw need not open from 0630 to 0959 and from 1500 to 1900 Monday through Friday, except Federal Holidays other than Columbus Day.
- (b) The draw need open only on the hour and half hour from 1000 to 1430 every day of the week, if at least 2 hour advance notice is given.
- (c) The draw will open on request at all other times if at least 2 hours advance notice is given.
- (d) Telephone requests for bridge opening may be directed as collect calls to the Highway Radio, or made by direct telephone communication through the Seattle Marine Operator, Station KOH, or through other marine wire or radiotelephone service.

OREGON – WILLAMETTE RIVER – PORT OF PORTLAND – Hawthorne Bridge Special Bridge Notice

The USCG has issued a deviation to the operation of the Hawthorne Bridge across the Willamette River, RM 13.1. This deviation allows the draw

span of the Hawthorne Bridge across the Willamette River to remain in the closed position, and need not open for maritime traffic from 1230 until 1330 on 29 Jul 12. Vessels which do not require a bridge opening may continue to transit beneath the bridge during this closure period. The draw span will be required to open, if needed, for vessels engaged in emergency response operations during this closure period. The bridge shall operate in accordance to 33 CFR § 117.897 at all other times.

Mariners are requested to keep a safe distance when in the vicinity of the research vessel and while transiting in the following area: 42-54-00N, 126-18-00W; 47-09-00N, 126-36-00W; 47-03-00N, 124-36-00W; 46-15-00N, 124-12-00W; 46-00-00N, 124-24-00W; 45-10-00N, 124-06-00W; 44-09-00N, 124-39-00W; 43-48-00N, 124-18-00W; 42-54-00N, 124-42-00W, see enclosure 5.

The research team will be deploying equipment within the above listed area between 24 Jul 12 until 06 Aug 12 that consist of: Thermistor array anchored to bottom, with a subsurface float that is 30-50 feet below surface, and Composite Environmental Acoustic Recording System array spanning most of the water column and anchored to bottom, with a subsurface float that is 30-50 feet below surface. All moored equipment will be marked with a 15 inch orange surface marker at a depth between 450 feet to 800 feet near the eastern edge of the area. The specific mooring locations will be determined on site, and updated in a future LNM. For more information, contact Dr. Roger C. Gauss (NRL) at (202) 767-3524 or roger.gauss@nrl.navy.mil.

COLUMBIA RIVER – Interstate 5 (I-5) Lift Bridges Special Notice

The USCG has issued a temporary deviation from the operating schedule that governs the Interstate 5 Bridges across the Columbia River, RM 106.5, between Portland, OR and Vancouver, WA. This deviation is necessary to facilitate the movement of heavier than normal roadway traffic associated with the Independence Day fireworks show near the I-5 Bridges. WASHINGTON – PUGET SOUND – HOOD CANAL BRIDGE – Special Notice

The USCG has signed a final rule which modifies the drawbridge operating regulation for the Hood Canal floating drawbridge near Port Gamble. The new rule allows the draw of the bridge not open for maritime traffic from 1500 until 1815 everyday during the summer months; from 22 May until 30 September, every year. Vessels which do not require a bridge opening may continue to transit beneath the fixed sections of the bridge during this closure period. Vessels of the U.S. Navy and vessels assisting with U. S. Naval operations, as well as, commercial tug and tow vessels are exempt from this regulation; therefore the draw span will be required to open, if needed, for these vessels during the closure period. The grounded barge previously reported anchored parallel to the Washington side of the Columbia River at RM 176.7, has sunk. Depths of 12 to 20 feet have been reported over the barge. A temporary green buoy labeled 'WK' with a quick green flashing (OG) light has been placed at approximate position 45-40-57.612N, 121-15-23.880W to mark the wreck. SNAKE RIVER – LAKE SACAJAWEA – Obstruction to navigation at the downstream approach to the Ice Harbor Lock and Dam (revised from LNM 01/12)

Please continue to use extreme caution when navigating through downstream of the approach to Ice Harbor navigation lock.

Shoaling has been discovered in the south edge of the navigation channel between RM 9 and the Ice Harbor Dam navigation cells, downstream of the dam spillway in the Snake River. This shoaling may be as much as 5 feet above the channel project depth of 12.8 feet. McNary pool is operating at 338.0 feet resulting in a tailwater at Ice Harbor navigation lock of approximately 339.0 feet. Mariners are advised to avoid the southern edge of the navigation channel.

A temporary operation to aid navigation during low flow conditions is currently in place. When possible, the Ice Harbor Operator will coordinate a temporary increase in the Ice Harbor tailwater elevation to improve conditions for tow/barges, subject to the following conditions:

- Traveling Downstream: Tow Captain to request an Ice Harbor temporary operation via the Lower Monumental Operator when leaving Lower Monumental, to allow a minimum of 2 hours lead time.
- Traveling Upstream: If aid is necessary for upstream navigation Tow Captain to call Ice Harbor control room not less than 30 minutes out, longer lead is better.
- Ice Harbor will attempt to provide the best possible conditions for navigation subject to all operating constraints and limitations.
- No increases allowed during night-time zero-generation hours 2000 to 0600.

The most current 2011 survey of the area in question is located on the Walla Walla District Navigation website. Please reference sheet 10 of 10 of the most recent hydrographic surveys located here:
